

THE 1100KL-EHR

DIGITAL PLATFORM SCALE WITH EXTRA WIDE HANDRAILS AND DIGITAL HEIGHT ROD

The Certified ADA Compliant 1100KL-EHR combines the industry-leading bariatric scale that supports up to 1000 pounds and provides the optimum quality, reliability, and ease of use with a state-of-the-art digital height rod. The market-leading height rod provides the most accurate height measurement in its class, with a graduation/resolution of 1mm/0.1" and a full measuring range of 11 ¾" – 79 ½" / 30cm – 202cm. The extra-wide "live" handrails on both sides of the platform allow the patient to hold on for stability while the scale accurately calculates weight and height.

Built-In Reset Feature

Proprietary technology eliminates mechanical sensors, reducing failures, increasing accuracy and reliability

Designed to meet the needs of doctor's offices, hospitals, clinics, and acute and long-term care facilities, the scale's keypad features antimicrobial protection, a display head that swivels 180°, a large slip-resistant low-profile platform, and wheels that enable portability.

The scale's high-contrast color screen provides a user-friendly interface that includes BMI, hold/release, reweigh, recall, zero, KG/LB, tare, pre-tare, and more. The exclusive Everlock® function allows the measuring unit (LB or KG) to be permanently locked on the scale. The scale provides easy integration and seamless communication with today's EMR applications, the 1100KL-EHR includes a USB interface for connectivity with a computer, EMR software, or other electronic devices via various Health o meter® Professional Connectivity Solutions.

The 1100KL-EHR digital platform scale with extra wide handrails and digital height rod was designed to meet the US Access Boards Standards: Medical facilities operated by state and local governments, also known as public entities, must comply with the MDE Standards for Accessible Medical Diagnostic Equipment, which is enforced by the Department of Justice.

- Slip-resistant platform
- Handrail supports on both sides of platform
- 34" – 38" max. handrail height from platform
