

## THE 500KL

# PRIMARY CARE DIGITAL SCALE

The number-one-selling physician scale in North America, the all-digital Health o meter® 500KL primary care scale provides the optimum in quality, reliability, and ease of use. Designed to meet the needs of doctor's offices, hospitals, clinics, and acute and long-term care facilities, the scale features a built-in height rod in the scale column, a large non-skid platform, and wheels that enable portability. The scale gives providers and patients an eye-level weight indicator for patients up to 550 pounds, with a user-friendly digital interface that includes BMI, hold/release, zero, tare, reweigh, recall, KG/LB, clear, and enter functions. The 500KL offers the best in its class extra-wide 8" wheelbase making transport easy. The exclusive Everlock® function allows the measuring unit (LB or KG) to be permanently locked on the scale.

The first healthcare scale to provide easy integration and seamless communication with today's EMR applications, the 500KL includes the option to add wireless connectivity to interface with a computer, EMR software, or other electronic device.

With its low platform height, the 500KL is easy to set up and offers patients a more comfortable and stable weighing experience.

### 500HB

"live" wrap-around handlebar

The 500HB is a unique handlebar accessory for the 500KL and is easy to attach to any new scale using the pre-drilled mounting holes and can also be attached to any existing scale using the easy-to-use drill guides. It provides the stability that many patients need without affecting the accuracy of the weight reading.

## THERE'S STRENGTH IN OUR NUMBERS.

When you add up the numbers on our scale, it's not surprising that the 500KL is the most widely used scale in physician offices nationwide.
