THE 2210KL-AM-C

ANTIMICROBIAL HIGH-RESOLUTION DIGITAL NEONATAL/PEDIATRIC TRAY SCALE

The 2210KL-AM-C neonatal scale was designed for use in the NICU, nursery, delivery room, and pediatric practices, where a high degree of accuracy is critical to the smallest of patients. The scale gives providers and patients safety with an Antimicrobial body, tray, handles, and keypad. The smooth-edged removable tray has a patent-pending mounting system that eliminates breakage, making it easy to clean. The built-in measuring tape allows users to measure both weight and height simultaneously. The scale will quickly lock despite the movement of the infant. The backlit display makes reading a patient's weight easier at almost any angle and light condition.

Smooth Rounded Edges

The high 1 gram resolution scale features a capacity of 20,000 grams/20 kg/45lb. The 2210KL-AM-C's user-friendly digital interface includes breast milk intake, auto-weight hold, hold/release, zero, tare, pre-tare, reweigh, recall, GM/KG/LB conversion and lockout, auto-zero, and auto-off. The scale's motion detection gives it the ability to weigh accurately despite the movement of the patient. The exclusive Everlock® function allows the measuring units (LB, KG, or G) to be permanently locked on the scale.
