

THE 565KL

HIGH-RESOLUTION DIGITAL BABY SCALE

The Health o meter® Professional 565KL neonatal/pediatric scale is designed to meet the demands of healthcare professionals in critical settings such as the NICU, nursery, delivery room, and pediatric practices. Its exceptional accuracy is especially crucial when caring for the tiniest patients.

The gently curved cradle provides comfort for infants, while the large angled display ensures caregivers can easily read weight measurements. Adjustable feet guarantee a level weighing surface, and the built-in measuring tape allows simultaneous weight and height assessment. Enhanced motion detection ensures quick locking even with an active infant. With a high 1-gram resolution, the scale accommodates a capacity of 20 kg (44 lb).

The 565KL's user-friendly digital interface offers a suite of features that enhance versatility in managing neonatal/pediatric patients. Notable functions include reweigh, hold/release, tare, recall, and a 5-minute weight hold. Additionally, the scale includes zero, pre-tare, KG/LB conversion, KG/LB/GM lockout, auto-zero, and auto-off features. The exclusive Everlock® function allows the measuring units (LB or KG) to be permanently locked on the scale.

The scale provides easy integration and seamless communication with today's EMR applications. The 565KL offers the option to incorporate wireless connectivity for interfacing with computers, EMR software, or other electronic devices via various Health o meter® Professional Connectivity Solutions.

THERE'S STRENGTH IN OUR NUMBERS.

When you add up the numbers on our scale, it's not surprising that the 565KL is your choice for accuracy and reliability.
